

Project for End-term in OOP (PROFE6)

1. Introduction
2. Objectives of the Study
3. Scope and Limitations
4. ERD
5. DFD
6. Use Case
7. Network Diagram
8. Data Dictionary
9. Storyboard
10. UML (Process and UI)
11. PERT CPM
12. GANTT Chart

Please read the Instructions:

- a. System 100% functionality (every process does not function minus 20%)
- b. System must be built in DJANGO and have an edge
- c. System OOP approach based on the 6 concepts, identify the following (based on the code of your system)
- d. Classes and Objects
- e. Inheritance
- f. Encapsulation
- g. Polymorphism
- h. Abstraction
- i. The system must have an **Analysis Visualization**
- j. The system will be presented based on the approved proposed title
- k. On the PERT CPM (**identify the path, then explain why you used that path, and what the possible problem was that you encountered**)
 - a. Identify the critical path
 - b. Identify the non-critical path
- l. On the storyboard, draw on the bond paper, no electronic output
- m. On the UML, make a diagram 3 on the behavioral diagram and 3 on the structural diagram
 - a. Put an explanation on every diagram
- n. Presentation is on June 16 – 20, 2025
- o. The schedule of presentations per group will be posted after the end-term examination
- p. Scheduled is scheduled if the time lapsed, then no more presentations are
- q. Just prepare the PPT for the presentation and the Documents
- r. Paper size: 8.5 x 11 (other sizes not accepted)

Panelist

1. Prof Charwin Padilla
2. Dr. Jose Leo Redoblo
3. Dr. Christine Redoblo
4. Mr. Tumabing
